Made from
recycled material

What are WhiptecBio biodegradable guards?

WhiptecBio guards are typically used for establishing new hedge rows. They can also be used for small tree whips.

What are they made from?

The guards are made from recycled material and a natural additive which is mixed with the moulded fibre.

Are WhiptecBio guards sustainable?

WhiptecBio guards are fully biodegradable, compostable and 100% sustainable.

Where are they manufactured?

WhiptecBio guards are manufactured in the UK from recycled material which is sourced in UK.

What is the lifespan of a WhiptecBio biodegradable guards?

WhiptecBio guards have a lifespan of 2-4 years, depending on the local environment.

Do I need to remove the guards once they come to the end of the lifespan?

There is no need to remove, the guards will naturally degrade back to their natural state.

Are WhiptecBio stronger than plastic guards?

These guards have been developed with advice from many arboriculturists for over the last 10 years and have been trialled in a variety of locations and conditions. Our WhiptecBio guards not only help develop stronger roots, but they provide vital protection from browsing animals.

What sizes are WhiptecBio guards available in?

There are two sizes:

50cm x 55mm x 55mm

60cm x 70mm x 55mm

When is the best time to use WhiptecBio guards?

WhiptecBio guards are best used as soon as young trees or whips are planted to provide protection for successful establishment and reduce damage from grazing and browsing animals.

What are the benefits of using WhiptecBio guards?

WhiptecBio guards are made from recycled material and are 100% sustainable. The flat pack design is cost effective to transport and has a very low carbon footprint. The guards are quick and easy to install and there is no need to remove.
