

NATURAL WILDFLOWER TURF

Why use Phoenix Natural Wildflower Turf?

- Our Natural Wildflower Turf is a mix of wildflower species, selected for their environmental, sustainability and aesthetic benefits with fine grasses for added interest and durability. Generally, the wildflower element will mature at 80% coverage given suitable growing conditions.
- Our Natural Wildflower Turf does not require low fertility soils to thrive. However, it may be better to avoid laying on green waste rich, manufactured soils.
- Our Natural Wildflower Turf comes palletised in easy-to-lay conventional rolls, not awkward slabs.
- In the warmer months, our Natural Wildflower Turf will be chilled to alleviate sod heating.
- Simply lay our Natural Wildflower Turf as you would conventional turf.
- Our Natural Wildflower Turf is **PROUDLY PLASTIC FREE** and comes on recycled and recyclable pallets.

Every effort is made to provide this broad range of species. However, our Natural Wildflower Turf is a natural product and some species may not survive or thrive subject to local conditions.

TYPICAL SEED MIX		
SPECIES	DESCRIPTION	%
<i>Centaurea nigra</i>	Common Knapweed	5.00
<i>Ranunculus acris</i>	Meadow Buttercup	1.00
<i>Linum usitatissimum</i>	Flax	1.00
